SUMMARY

Passionate Flutter developer focused on building a solid foundation in cross-platform mobile app development using Dart and Flutter. Experienced in creating small-scale apps to apply core concepts like UI design, widget tree structure, and navigation. Dedicated to continuous learning and growing into a full-stack Flutter developer through hands-on practice and real-world application building.

Programming Languages: Dart, C++, Java, Kotlin

Frameworks: Flutter

PROJECTS

- Lottery App – Generates random number and displays winning message
- To-Do List App – Task management app using List View and state handling
- WhatsApp UI Clone – Recreated WhatsApp front-end with custom UI layout and chat list
- Quotes Generator App – Displays random motivational quote on button tap

EXPERIENCE

Currently learning Flutter and Dart with a focus on cross-platform mobile app development. Practicing UI design, basic navigation, and layout building using Flutter's core widgets. Built small apps like a Lottery Number Generator, To-Do List, and a WhatsApp UI clone to strengthen understanding of mobile interfaces. Using Android Studio as the main development environment while consistently working to improve skills and understanding of app structure.

EDUCATION

University of Engineering and Technology (UET), Taxila   Taxila

B.S in Computer Science   *2022 – 2026*

CERTIFICATIONS

- Real Android App Dev 15 hours| Kotlin Dev X   Udemy
